DELAMAR CUMPANY MINES.

Salt Lake Tribune, July 21st-The crude ore of the almost matchless been made to relinquish their hold \$10,000,000, its fortunate and deservi ing owner who wrested t from the embrace of the wilderness has dete mined to sweep up the crumbs that mighty neill, and to that end is now designing a plant with which to treat the tailibus.

This animonicement was made by

J. R. Delansar upon his return, enameled with the dust of a long drive over the desert, yesterday morning.

It is a fact, said Capt. DeLamar resterday, that on the dumps which have been accumulating all there years that a stream of gold was pouring from the mill, are no less than 400,000 tons of tailings. These are saturated with a solution of cyanide of potassuium, and exhaustive experments have demonstrated that with Harry Arinott, locator and part the application of nothing more expensive than plain water the dum; s may be made to yield a clean margin of \$1 per ton, or \$400,000 for the lot. So easy is the undertaking that it practically consummates itself, and with a machine for elevating the gravel, and a man to turn on the hose,a golden stream begins to gush from a new source.

That the tailings are to be treated at this time is no intimation that the ore bodies of the mine itself have been depleted. On the contrary, the captain reports great blocks of reserves, some of which, that were rendered temporarily inaccessible by the memorable "cave-in" at the bonanza, showing a valuation as high as \$200 per ton, while the whole maiotains a clearly defined margin. Indeed, according to measurements, there are still exposed enough gold bearing ore to keep the main mill going constinuously for years.

The Captain, who was accompanied during his inspection by his general manager, H. A. Cohen, is most enthusiastic over the condition in which he found the peoperty, and congratulates Supt Swindler upon the masterly manner which he has presided over it.

Capt DeLamar will inspect his in-California, to return to Sa't Lake, with which city he will divide more Journal. of his time in future.
